

Xcell 032 Series

Engineered for tomorrow

The **PE** DU Series drum melters offer the best alternative for high quantity adhesive dispensing on continuous jobs. DU series offers total flexibility in its control, from traditional analog to the most complete operational control through PLC network connected to your production line.

PE Reinvent the machine

- Greater durability for longer lasting equipment.
- Integrated auto feeder.
- Reliability and control.

Capacities 4L, 8L, 16L.

Lighting beacon and level production sensor.

New advanced shooting control.

High flow pump with electric activation.

Activation charge micron visualization.

Xcell 032 Series

Filtration in to out system makes the cleaning and the maintenance easier.

Optional pressure discharge system.

Ergonomic base with easy anchor and compatible with other standards equipments.

Optional screening deposit.

Even 12 independent temperature control zones and 6 production hydraulic exits.

Optional external recirculation to the distributor.

Pneumatic pressure control and production manometer.

- Capacity : 4L - 8L - 16L
- Fusion capacity: 4.2kg/h 7.9kg/h - 13.5kg/h
- Pumping capacity: 100kg/h
- Compression rate: 14:1
- Consumption power: 1800W - 2800W - 4800W
- Work Temperature: 30°C - 240°C
- Work viscosity: 50000 cps
- pneumatic pressure: 0.2bar - 6bar
